

Instructions for slushy machine

Place the machine on a sturdy base. You are about to add 20kg to the weight.

If you have any problems call: **0408 259 253**

1. Add the water to both sides.	** See Below
2. Add the mix to both sides.	
3. Plug machine in.	
4. Turn machine on.	
5. Push this button on both sides to start the Augers.	
6. Add alcohol (if desired).	
7. Push this button on both sides until "ICE" appears on the display. <small>(If you are setting this machine up the day before, push this button until "CHILL" appears on the display- about an hour before use it press the button until "ICE" appears).</small>	
Alcohol Free Slushies:	Alcohol Slushies:
1L mix to 4L water (one side) Repeat for other side.	1.2L mix to 4L water + alcohol (one side) Repeat for other side.
2L mix to 8L water (one side) Repeat for other side.	2.4L mix to 8L water + alcohol (one side) Repeat for other side.

**** VERY IMPORTANT- Add water to the machine first as per instructions, sometimes a seal will be pinched at the back of the hopper. If this is the case, water will leak quickly from the machine, please call the number provided if this happens. The mix must be added before you try and turn the machine to ICE". Only the mix supplied with the machine can be used and any damage resulting from the use of incorrect mix will be the responsibility of the hirer.**
